

It is my desire for you to reject NAB's petition 04-160 and support XM's ability to provide the service that XM radio consumers have bought and paid for. The NAB needs to allow competitive competition as any other business. Many of us in the U.S. have been forced into adapting a more level playing field with the rest of the world. A profitable business is becoming more and more difficult as we all accept these changes. They are also guaranteed this right in the Constitution of this great country.

Thank You,

Martha Lewis
